PROFESSIONAL SUMMARY

Senior Backend & Full-Stack Engineer with 10+ years of experience designing and scaling business-critical applications across eCommerce, healthcare, and organizational platforms.

Expertise in Laravel, Vue 3, REST API architecture, subscription billing systems, ERP integrations, and database optimization. Proven experience in multi-brand platform architecture, backend ownership, pricing automation systems, and production-grade deployments on GCP.

Strong focus on system design, performance optimization, and building scalable backend workflows.

Technical Skills:

Backend & Architecture: Laravel, PHP, REST APIs, Service Layer Architecture, Cron Jobs, Queue Workers, Multi-Brand Architecture, API Versioning

Frontend: Vue.js (Vue 3 + Composition API), Inertia.js, JavaScript, Bootstrap

Database & Performance: MySQL, Schema Design, Indexing, Query Optimization, Reporting Queries

Payments & Integrations: Razorpay (Subscriptions & Add-ons), PayPal, Braintree, Afterpay, CCAvenue, Forter, Apparel21 ERP

Cloud & Tools: Google Cloud Platform (GCP), Git, Deployment & Monitoring

Professional Experience:

Senior Backend Engineer | Orion Solution
Official Designation: Senior Web Developer

August 2014 – Present

Key Projects:

- Multi-Brand eCommerce Platforms – Brooks Running, RH Sports & JanSport Australia

Key Technologies: Laravel, Vue 3, Inertia.js, MySQL, Redis, GCP, Braintree

- Architected and maintained multi-brand eCommerce platforms for Australia & New Zealand markets with shared backend APIs and brand-specific frontend applications.
- Designed scalable product, pricing, inventory, and order lifecycle workflows for Brooks Running platforms.
- Integrated Apparel21 ERP for automated product synchronization and order confirmation processes.
- Optimized pricing-heavy catalog queries and database performance, reducing API latency by ~30%.
- Designed queue-based background jobs for stock synchronization, pricing updates, and reporting workflows.
- Managed deployment, monitoring, and production support on Google Cloud Platform (GCP).
- Implemented Braintree payment gateway integration for RH Sports Australia, including secure transaction processing and order workflows.

- **FIFA India – Subscription & Membership Platform**

Key Technologies: Laravel, MySQL, Razorpay, MakeMySMS

- Implemented Razorpay Subscription API with auto-debit recurring billing and dynamic add-on creation workflows.
- Integrated MakeMySMS API for automated transactional SMS notifications related to subscriptions, renewals, and payment events.
- Designed backend workflows for subscription lifecycle management, renewal handling, and payment status tracking.
- Built admin dashboards for subscriber management, payment monitoring, and reconciliation workflows.
- Developed CMS-driven modules for managing organizational content, announcements, and event-related updates.
- Implemented secure backend validation and transaction handling for subscription-based payment flows.

- **Hospital Management Admin System (SMHH)**

Key Technologies: Laravel, Vue.js, MySQL

- Co-designed relational database schema for OPD/IPD patient management, admission tracking, and billing workflows.
- Developed backend modules for patient registration, admission management, medical history tracking, and billing operations.
- Built daily and summary-based OPD/IPD reporting modules for operational and billing analysis.
- Optimized aggregated reporting queries using indexing and structured joins to improve report generation performance.
- Collaborated with stakeholders to translate hospital operational requirements into scalable backend workflows.

- **Price Revision System for Western Metal Industries Pvt. Ltd.**

Key Technologies: Laravel, Vue.js, MySQL

- Designed and developed pricing automation system for bulk customer-wise price revision workflows.
- Implemented date-based pricing logic with historical revision tracking.
- Built cron-based automation for scheduled pricing updates and effective-date activation.
- Optimized complex pricing and revision queries using indexing, structured joins, and query tuning techniques.
- Reduced manual pricing intervention and improved pricing consistency through workflow automation.

Web Designer | Katapult Technologies Pvt. Ltd

July 2013 – May 2014

Education:

- **Bachelor of Engineering (B.E.) in Computer Engineering**
Mumbai University, India
- **Diploma in Computer Engineering**
MSBTE, India
